

Yaroslav Barov

Senior Frontend Engineer | Frontend Platform & Developer Experience (DX) | Design Systems | React · TypeScript

yaroslav.barov@gmail.com · +381 61 2283 192 · LinkedIn · GitHub Belgrade, Serbia · Work authorization: Serbia · Remote (CET / UTC+1) · Open to full-time or contract / B2B Published open-source tooling: swc-plugin-react-source · babel-plugin-react-source-string (npm)

PROFESSIONAL SUMMARY

Senior Frontend Engineer / Frontend Software Developer with 10 years building complex, high-load web user interfaces and the frontend platform tooling that keeps large codebases healthy. Deep expertise in React, TypeScript, JavaScript (ES6+), Redux Toolkit, and modern build tooling (Webpack, RSpack, Babel). Specialized in developer experience (DX), design systems, code-quality and linting infrastructure (ESLint, StyleLint), strict TypeScript migration, accessibility (a11y), performance optimization, and legacy modernization. Hands-on with custom ESLint/Babel/Webpack plugins (AST-level tooling), CI/CD, automated testing, and frontend architecture. Strong product background (A/B testing, cross-functional collaboration with design and product), plus two years mentoring frontend developers and driving org-level quality initiatives — moving toward a frontend / engineering team lead track.

AREAS OF EXPERTISE

Frontend Development · Web Development · Single-Page Applications (SPA) · React · React.js · TypeScript · JavaScript · ECMAScript (ES6+) · Redux · Redux Toolkit · HTML5 · CSS3 · SCSS / Sass · Responsive Design · Cross-Browser Compatibility · UI Development · Component Architecture · Design Systems · Reusable Component Libraries · Accessibility (a11y) · WCAG · Frontend Platform · Developer Experience (DX) · Developer Tooling · Build Tooling · Webpack · RSpack · Babel · SWC · Next.js · Module Bundling · Tree Shaking · Dead Code Elimination · Code Splitting · Performance Optimization · Code Quality · Static Code Analysis · Linting · ESLint · StyleLint · Prettier · Husky · Custom Lint Rules · AST (Abstract Syntax Tree) Tooling · Compiler Plugins · Strict Type Safety · TypeScript Migration · Refactoring · Legacy Modernization · Unit Testing · Jest · Playwright · A/B Testing · CI/CD · GitHub Actions · Git · Docker · Sentry · Error Monitoring · REST APIs · Node.js · Python · Bash · Code Review · Mentoring · Team Leadership · Agile · Scrum · Cross-Functional Collaboration · jQuery

PROFESSIONAL EXPERIENCE

TheSoul Publishing — Senior Frontend Developer

Belgrade · Jun 2023 – Jun 2026

Frontend platform, developer experience (DX), and code-quality engineering on a large React / TypeScript codebase.

- Built the team's linting and code-quality infrastructure: grew the ESLint ruleset from a minimal config to 220+ rules, then migrated it to maintained plugin presets (@eslint-react/eslint-plugin, @stylistic/eslint-plugin, eslint-plugin-import-x, typescript-eslint); set up StyleLint from scratch and standardized formatting with Prettier and Husky.
- Wrote custom ESLint rules (AST-level) for import sorting and async error handling.
- Built and published custom Webpack / RSpack / Babel plugins (open-source on npm) that tag rendered HTML with JSX source locations to speed up debugging: babel-plugin-react-source-string (Webpack/RSpack) and swc-plugin-react-source (Next.js/RSpack).
- Added CI/CD rules backed by a custom Babel plugin that detected and removed 12,000+ lines of dead code, improving build performance and maintainability.
- Led the TypeScript configuration migration to recommended guidelines and replaced any types with concrete types across the entire project, raising type safety and refactoring large parts of the legacy codebase.

- Worked on a new design system (reusable component library) to replace the legacy MUI-based one.
- Set up and maintained Sentry for error tracking and monitoring.

HeadHunter Group — Senior Frontend Developer

Dec 2016 – Apr 2023 · HeadHunter: leading online recruitment platform in Russia, 1,000+ employees
High-load product frontend on two business-critical services (vacancy search and employer search), through two major rewrites.

- Part of two large-scale rewrite / modernization efforts: jQuery / XSLT → React / Redux and JavaScript → TypeScript.
- Built new functionality and shipped product features through A/B testing; developed half of the UI for the A/B testing service.
- Wrote unit tests (Jest, Enzyme) with 50–95% coverage depending on the project.
- Reviewed colleagues' code and collaborated cross-functionally with designers to improve UI/UX.
- Taught frontend at the HeadHunter Developer School for two years (mentoring).
- Drafted a long-term plan to integrate accessibility (a11y) into the existing codebase, with economic, marketing, and humanistic justifications.

Action Media Group — Frontend Developer

Apr 2016 – Nov 2016

- Built accounting web applications focused on form validation and calculation logic.

Skytrack LLC — Frontend Developer

Jun 2015 – Mar 2016

- Rewrote legacy jQuery code in Angular.
- Built interactive analytics charts and data visualizations with jQuery, Angular, and D3.js.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SCSS/Sass, Python, Bash **Frameworks & Libraries:** React, Redux Toolkit, Next.js (exposure), jQuery **Build & Tooling:** Webpack, RSpack, Babel, SWC, custom compiler/bundler plugins, AST tooling, tree shaking, code splitting, dead code elimination **Code Quality:** ESLint (custom rules), StyleLint, Prettier, Husky, static code analysis, strict TypeScript **Testing:** Jest, Playwright, unit testing **CI/CD & DevOps:** Git, GitHub Actions, Docker **Monitoring:** Sentry **Backend (working knowledge):** Node.js, Python, Tornado, REST APIs **Practices:** Design systems, accessibility (a11y), performance optimization, legacy modernization, A/B testing, code review, mentoring, Agile/Scrum

EDUCATION

Bachelor's Degree, International Economics — Moscow State University of Instrument Engineering and Computer Sciences (MGUPI), 2004–2009

LANGUAGES

- English — Upper-Intermediate (B2)
- Russian — Native
- Srbski - B1
