Professional Summary

Frontend Developer with 10 years of experience building complex UIs, accessibility features, and design systems. I raise code quality through linters and type systems, strip dead code from CI, and ship features with design and product teams.

Professional Experience

Senior Frontend Developer

TheSoul Publishing (July 2023 - Present)

- Led the migration of TypeScript configurations to recommended guidelines.
- Set up StyleLint from scratch.
- Grew the ESLint ruleset from a minimal config to 220+ rules, which were later migrated to predefined rule sets from plugins such as `@eslint-react/eslint-plugin`, `@stylistic/eslint-plugin`, `eslint-plugin-import-x`, and `typescript-eslint`.
- Wrote custom ESLint rules for import sorting and async error handling.
- Built a Webpack plugin that tags rendered HTML with JSX source locations to speed up debugging. (webpack/rspack - babel-plugin-react-source-string, next/rspack - swc-plugin-react-source)
- Added CI rules backed by a custom Babel plugin that caught and removed 12,000+ lines of dead code.
- Refactored large parts of the legacy codebase. Replaced TypeScript `any` types with concrete types across the whole project.
- Set up and maintained Sentry for error tracking.
- Building a new design system to replace the MUI-based legacy one.
- I did 99% of the work. AI the rest.

Frontend Developer

HeadHunter Group PLC (December 2016 - April 2023) HeadHunter Group: leading online recruitment platform in Russia, 1,000+ employees.

- Worked on the vacancy and employer search services.
- Joined major rewrites: jQuery/XSLT to React/Redux, JavaScript to TypeScript.

Primary duties:

- Built features through A/B testing.
- Wrote unit tests in Jest and Enzyme, with 50-95% coverage depending on the project.
- Reviewed code and worked with designers on UI.

Achievements:

- Taught at HeadHunter Developer School for two years.
- Built half of the UI for the A/B testing service.
- Drafted a long-term plan for integrating accessibility into the codebase, with economic, marketing, and humanistic justifications.

Frontend Developer

Action Media Group April 2016 - November 2016

- Built accounting web apps focused on form validation and calculation logic.
-

Frontend Developer

Skytrack LLC June 2015 - March 2016

- Rewrote legacy jQuery code in Angular.
 - Built analytics charts with jQuery, Angular, and D3.js.
-

Skills

- Programming Languages: JavaScript (ES6+), TypeScript
- Frameworks & Libraries: React, Redux Toolkit
- Testing & Build Tools: Jest, Webpack, RSPack, Babel
- Linting: Husky, ESLint, StyleLint, Prettier
- Backend Technologies: Node.js, Python, Tornado

- Version Control & CI/CD: Git, GitHub Actions, Docker
 - Scripting: JS, Python, Bash
-

Languages

- English: Intermediate
- Russian: Native
